ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: A DEVICE FOR MOULDING FOOD SUBSTANCES

(57) Abstract: A device for moulding foodstuff masses comprises: - one or more moulds (14) provided with sockets (16) which define pouring cavities; inserts (22) made of thermally conductive material associated, in a relationship of heat exchange, with the pouring cavities (16); and - thermal-conditioning cells, associated to the conductive material (2). There is present generating signals for conditioning units (24) thermal treatment of units (24), such as Peltier a inserts made of thermally control unit control of the so as to provide the material (34) for thermalcycles of undergoing selectively pre-determined pouring. A preferential application is in the sector of the confectionery industry.
